

SEATING THAT SUPPORTS EVERY LEARNER

From early elementary through high school, Cogni gives every student a comfortable, age-appropriate seat. Designed with input from educators and students, it blends ergonomics, sensory-friendly features, and durability to keep learners engaged all day.

BUILT FOR ENGAGEMENT

Cogni supports the natural rhythm of the classroom. Its patent-pending tactile seat surface provides sensory feedback that helps students stay present, while the contoured seat and flexible back encourage comfort in every posture. With options like a patent-pending heel-wheel for effortless mobility, Cogni makes it easy for students to shift, move, and reset, keeping learning active and engagement high.

CHOICE FUELS FOCUS

Every student learns differently, some need movement, others prefer stillness. Cogni empowers that choice with a design that supports multiple sitting styles and natural motion. By giving students the freedom to find their best fit, Cogni helps them stay attentive, confident, and engaged.

COGNI STATEMENT OF LINE

Cogni adapts to any classroom aesthetic and accommodates learners of all sizes. It features cantilever chairs (14–18"), four-leg chairs (12–18"), four-leg stools, task chairs, and task stools. With a broad selection of poly colors, frame finishes, optional upholstered seats, and replaceable felt, nylon, steel or hybrid non-skid glides, Cogni makes it easy to create cohesive, expressive learning spaces.
